### Product Description

Trust the Wi-Fi® enabled TruSens Smart Air Purifier for cleaner air. You can monitor both indoor and outdoor air quality remotely with the mobile app, and the purifier works with Alexa device voice commands.

### Features

- Stay connected. Use the mobile app for remote functionality, to track outdoor air quality changes, set up a schedule, get filter change reminders, and reorder supplies.
- Avoid outdoor air pollutants by relying on the TruSens mobile app to keep you informed of any changes in outdoor air quality
- The enhanced sensor measures smaller particles (PM1.0, PM2.5, PM10), that can be inhaled and get into your lungs and bloodstream. Enhanced SensorPod detects smoke as well as certain VOCs and odors such as formaldehyde and paint fumes.
- TruSens keeps you informed. A color-coded illuminated ring and numerical value communicates good, moderate, or poor air quality.
- PureDirect technology uses two airflow streams to distribute air more comfortably, delivering purified air more effectively than traditional horizontal air purifiers
- The 360 degree DuPont HEPA filter helps capture common pollutants and VOC gases/odors from all directions. UV-C light reduces germs and bacteria trapped in the filter.
